EDUCATION

HIGH SCHOOL DIPLOMA

SHFMU "Lutfi Musiqi", Vushtrri

Since resuming my studies at *SHFMU "Lutfi Musiqi"* in Vushtrri over a year ago, I've continued to grow both academically and technically. The school has provided a strong foundation in practical and technical skills, which has supported my passion for programming and real-world problem-solving.

ABOUT ME

I am a highly motivated and self-taught front-end developer who began coding at the age of 12. What started as curiosity quickly turned into a passion, and now at just 16 years old I've already built and launched real-world web applications that solve problems and bring value to users. I enjoy turning ideas into interactive digital experiences and constantly seek ways to improve both my skills and the impact of my work. Over the past few years, I've learned and applied core web technologies including HTML, CSS, JavaScript, and React, while also gaining valuable hands on experience through personal projects and small team collaborations. I've developed full websites from scratch, such as platforms for online doctor consultations and a second hand clothing marketplace, which are live and used in practice. I'm a fast learner, passionate about building useful and meaningful web products, and always open to new challenges. Whether it's solving a UI problem, improving performance, or learning a new framework, I embrace every opportunity to grow. I also enjoy staying active in the dev community by posting on LinkedIn, writing blogs, and keeping up with the latest in tech.

WORK EXPERIENCE

Leard Kalludra, Vushtrri | PRESENT

🌐 **Pyet Doktori**n *Front-End Developer | 2023 - 2024* An online platform for booking medical appointments and consulting with doctors. **Key Contributions**:

- Built responsive user interfaces using HTML, CSS, and React.

- Implemented the appointment booking system and question submission feature.

- Enhanced the overall user experience with a clean and intuitive design.

👕 **Dollapi I**m *Front-End Developer | 2024 - 2025* A marketplace for users to sell, buy, and request second-hand clothes and fashion items. **Key Contributions**:

- Designed and developed pages for posting clothes, searching, filtering, and ordering items.

- Focused on responsive and user-friendly interface design.

- Collaborated on feature ideas based on user needs.

HOBBIES

Outside of programming, I enjoy spending my free time playing basketball and video games. Gaming helps me think strategically and stay sharp, while basketball keeps me active and teaches me teamwork and discipline. I also love exploring new tech tools and sharing what I learn through posts and blogs—it keeps me inspired and connected with others in the tech community.
